Now (GA - end of October)	Next (Next ~6 months)	Later (Active exploration)	Done (Recently released)
Evidence uploads & manager sign-off Admins add an evidence step to any learning experience; learners submit photos, video or documents, and managers review and approve from My Team.	Richer content authoring Image and audio upload, Storyline support, improved video embedding, and duration on learning experiences.	Recurring events Repeating session schedules.	LX creation wizard Build and publish a learning experience in minutes.
Events management Native event creation and scheduling, single-session first, with attendance feeding course completion for a true compliance record.	Multi-language support Translated content across the new admin, with a full editing experience to follow.	Catalogue & discovery Learner browse and self-enrol.	Admin essentials LX management, enrolment and due dates, imports and core reports.
Fully native admin Users & Groups, Assessments, and Roles & Permissions rebuilt natively, completing the move to the new experience.	Custom fields Define organisation-specific profile fields to capture and report on the data that matters to you.	Social learning returns Comments, discussions and badges return.	First frontline customer live Launched end to end with secure single sign-on for a major hospitality group.
Manager requests management Managers requests management will allow managers to approve or reject events and course signups.	Expanded reporting Activity-level progress reporting.	Advanced organisation admin Branding, org settings, hierarchy, SSO and roles.	
	Resources library A full content library: browse, edit and reuse resources across learning experiences.	Office document content Author and view documents, presentations and spreadsheets inside a learning experience.	
	Automations access Reach your automation workflows directly from the admin home.	AI Companion AI assistance for admin workflows.	
		Skills Skills tools for the admin experience.

Learn:Go

Now (GA - end of October)	Next (Next ~6 months)	Later (Active exploration)	Done (Recently released)
Manager analytics New analytics section for managers to follow their team metrics around readiness and behaviour.	Shared device experience Fast, simple login for shared-device environments, so frontline workers can securely pick up their learning on any device.	Social learning: Communities Employees can join communities to share tips, ask questions, and learn from peers, making the informal knowledge-sharing that already happens visible, safe, and credited.	
Ad-hoc assignment of courses New feature to manage the courses assignment where managers can direct learning experiences to their team members as either required or optional.	Onboarding experience A guided first-run experience - a short profile survey plus in-app tooltips - to personalise the app from day one and help learners find their way around.	Social learning: UGC Employees can create and share their own bite-sized learning content, from quick tips to how-to videos.	
On-the-job training A brand new process that allows assessors and learners to navigate an assessment experience guided by their Learn:Go App, culminating on an evaluation of the learner.	Recommendations v1 First layer of recommendations based on simple signals, surfacing relevant LX/events to learner without manual curation.		
Priority customer fixes The critical and high-priority feedback items raised by our first live frontline customer.			
Discoverability of LX and Events Improve browse and search so learners can find relevant LX and events easily.
