

LXP

Now (Next 3 months)

Events Management Improvements

A redesigned Admin Events page showing Upcoming, Unscheduled, All and Past Events on separate tabs and in date order, making it easier to find and manage events.

Simplified session visibility: Admins can quickly access session-level details directly from an event when it has a single schedule.

Ability to add custom fields at schedule level, enabling organizations to capture and manage information specific to their schedules.

Upload existing users to an event schedule in bulk via CSV, making it quicker and easier to manage event participation.

Next (January release)

Side by Side Observations

Enable managers and team leads to assess employees' practical skills in the workplace.

Events Granular Permissions

Flexible, role-based access controls at event, schedule and session level, enabling organizations to delegate administrative responsibilities.

OpenSesame integration

Integration between the LXP and the OpenSesame learning platform, giving learners access to OpenSesame's extensive course catalogue directly within the LXP. This will create a more seamless and integrated learning experience, without needing to navigate to a separate platform.

Later (Active exploration)

Events: Facilitator Role

Dedicated event delivery role.

Events: Facilitator Reporting

Session & enrollment reporting.

Events: Waitlist Management

Waitlists with admin controls.
