Learn:Go

Now
(October release)

Events admin
Native event creation and scheduling, single-session first, with attendance feeding course completion for a true compliance record.

Fully native admin
Users & Groups, Assessments, and Roles & Permissions rebuilt natively, completing the move to the new experience.

Discoverability of LX and Events
Improve browse and search so learners can find relevant LX and events easily.

Custom fields in reporting
Organization-specific fields surfaced as report columns, with your fields pre-enabled at onboarding. Full self-service field management to follow.

Learner Preview
See a learning experience exactly as your learners will, straight from admin - check every page before it reaches the floor.

Next
(January release)

Practice Integration
Confirm Practice AI simulations connected into Learn:Go - assign, launch and track simulation practice alongside learning.

Multi-language support
Translated content across the new admin, with a full editing experience to follow.

Resources library
A full content library: browse, edit and reuse resources across learning experiences.

Automations access
Reach your automation workflows directly from the admin home.

Create Integration
View and utilise content generated from Create within Learn:Go's admin

Search with AI Insights
Search for LXs with AI insights embedded.

Later
(Active exploration)

Recurring events
Repeating session schedules.

Catalogue & discovery
Learner browse and self-enrol.

Expanded reporting
Activity-level progress reporting.

Advanced organisation admin
Brand, org, hierarchy, SSO & roles.

Office document content
Author and view documents, presentations and spreadsheets inside a learning experience.

AI Companion
AI assistance for admin workflows.

Social: Comments and Sharing
Space to engage with content

Richer content authoring
Image and audio upload, Storyline support, improved video embedding, and duration on learning experiences.

Done
(Recently released)

LX creation wizard
Build and publish a learning experience in minutes.

Admin essentials
LX management, enrolment and due dates, imports and core reports.

First frontline customer live
Launched end to end with secure single sign-on for a major hospitality group.

Manager requests management
Managers requests management will allow managers to approve or reject events and course signups.

Evidence uploads & manager sign-off
Admins add an evidence step to any learning experience; learners submit photos, video or documents, and managers review and approve from My Team.

**Items on our roadmap are subject to change as requirements are defined.*

Areas awaiting their native rebuild remain fully usable in the current admin - the rebuild upgrades the experience, not the capability.

Learn:Go

Now
(October release)

Manager analytics
New analytics section for managers to follow their team metrics around readiness and behaviour.

Priority customer fixes
The critical and high-priority feedback items raised by our first live frontline customer.

Next
(January release)

Learning journey (pathways)
Ordered learning journeys that guide learners step by step toward a goal, with built-in progress and next-step prompts, replacing manual assignment.

Recommendations v1
First layer of recommendations based on simple signals, surfacing relevant LX/events to learner without manual curation.

Onboarding experience
A guided first-run experience - a short profile survey plus in-app tooltips - to personalise the app from day one and help learners find their way around.

On-the-job training
A brand new process that allows assessors and learners to navigate an assessment experience guided by their Learn:Go App, culminating on an evaluation of the learner.

Later
(Active exploration)

Skills
Skills framework tailored towards the frontline experience. Assess job titles, task requirements, plan careers and understand readiness and capability across the board, powered by an AI companion to support the framework maintenance.

Conversational analytics
Ask questions of platform data in plain language, "who's overdue on food safety at the Leeds site", and get the answer with a custom chart behind it, without building a report.

Shared device experience
Fast, simple login for shared-device environments, so frontline workers can securely pick up their learning on any device.

Done
(Recently released)

Manager LX assignments
Allows managers to directly assign learning experiences to their team members. Workers get notified in app they just got assigned to a new course.

**Items on our roadmap are subject to change as requirements are defined.*
