LXP

Now
(October release)

Events Granular Permissions
Flexible, role-based access controls at event, schedule and session level, enabling organizations to delegate administrative responsibilities.

Events: Waitlist Management
Waitlists with admin controls.

Events: Facilitator Role
Dedicated event delivery role.

OpenSesame integration
Access OpenSesame's course catalogue directly within the LXP, without switching platforms.

Next
(January release)

Side-by-Side Observations
Enable managers and team leads to assess employees' practical skills in the workplace.

Events: Facilitator Reporting
Session & enrollment reporting.

Later
(Active exploration)

Modern Search: Filter by Language
Filter search results by language, so learners can easily access content in the language they need.

Events: Additional Improvements
Customer-driven enhancements, including improvements to the UI and functionality.

Ongoing Feedback Review
Continuing to review and prioritize feature requests against future portfolio investment.

Done
(Recently released)

Events Improvements (Docs)
A redesigned Admin Events page showing Upcoming, Unscheduled, All and Past Events on separate tabs and in date order, making it easier to find and manage events.

Simplified session visibility: Admins can quickly access session-level details directly from an event when it has a single schedule.

Ability to add custom fields at schedule level, enabling organizations to capture and manage information specific to their schedules.

Upload existing users to an event schedule in bulk via CSV, making it quicker and easier to manage event participation.

Modern Search: Filter by Duration (Docs)
Filter search results by the duration of LXs, so learners can find content that fits the time they have.
