How to use these slides

Always use the latest
The roadmap slides are updated monthly, always ensure you're using the latest version from Confluence.

Choose the right content
We have multiple roadmaps for different needs. Select the right content for each customer. If you need advice please reach out to the Product or Product Marketing team.

Utilize the speaker notes
Some slides have useful speaker notes that can be used for guidance on calls.

Ask for help
Reach out to the Product team if you need help. We're more than happy to support roadmap conversations!

Share feedback
We're always keen to hear feedback from customers, so please share it back to the Product team.

Retain the link
If you're copying slides into another slide deck, choose "Link & keep original styles", this will link the slide back to the source, so you can quickly update it when needed.

Our roadmap approach

The roadmap is split into three phases of **Now**, **Next** and **Later**.

Now
3 months

Building, testing and releasing

Next
~6 months

Designing, prototyping and testing

Later
Active Explorations

Research and gathering feedback

©2026 Confirm

LMS

Now
(October release)

HTML Editor on Program and Certifications Notifications
We're enhancing the notification experience by adding a HTML editor to the notification setup on the LP LMS.

Multi-Factor Authentication
Offer stronger security through multi-factor authentication.

Program & Certification Self-Enrolment
Support Learner-driven training through self-enrolment.

Next
(January release)

Revert Login Improvement
Site Managers will return to the exact same page, saving time during support investigations.

Email Template Access
Access to email template settings so they can manage their own email template

URL Display Improvement
Add an "Open in new tab" display option to the URL resource activity, so learners can access external links without losing their place

Later
(Active exploration)

Accessibility Block
Adds a persistent accessibility widget that lets learners personalize the visual appearance of the site.

Bulk Action-Remove from Audience
"Remove from Audience" bulk user action to LP LMS, letting admins select users, choose a target audience, confirm, and remove them.

Seminar - Message Managers
Ability for Site Managers to message managers directly from the Attendees section improving coordination on session/course communication.

Dashboard Management
Add sorting and sort-preference persistence to the Dashboard list.

Done
(Recently released)

Seminar QR Codes Scanning (Docs)
Streamline sign-in and attendance tracking at in-person training events.
